IRISES From "The Top of the World"

ONE of my specialties is the Iris. Out here "Where the West Begins," or IS—the altitude (mile high), the dry air, the abundant sunshine—all combine to produce clean healthy stock.

Winters are cold enough to eliminate varieties that will not do well in nearly every section, yet not severe enough to cause loss or weakening of plants from heaving of the roots.

As with the Gladiolus, I'm strong for the newer varieties, yet grow and offer many of the better less expensive kinds also. The following list speaks for itself.

Regarding quality, service and prices, no one has a monopoly on this. I've found that one division may be worth twice as much as another of same variety. Yet they look alike in print.

LILY OF THE VALLEY

Lily of the Valley answers that question: "What can I grow in shade or partial shade?" Thrives also out in the open, but is especially valuable for places where many other flowers will not grow. May be planted in clumps, or the clumps may be pulled apart, making 30 or more single roots. Good way to get quick results is to make 5 to 8 smaller clumps from the one I send you. Use fine sand liberally in soil when planting, give plenty of water, and your plants will bloom and spread nicely. (Clump, \$1.00) (3 clumps, \$2.25) (6 clumps, \$4.00) (1/2 clump, 65c). All prepaid. Shipment in Sept.

WRITE RIGHT NOW to have me put your name on file for my September catalogue, listing not only the usual fall bulbs but "Gladiolus Bulbs at Digging Time Prices."
